Forward-Looking Statements

Certain statements in this presentation, other than statements of historical facts, including statements regarding our strategy, future operations, future financial position, future revenues, future costs, prospects, plans and objectives of management are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Statements that include the words "expect," "estimate," "anticipate," "predict," "believe," "think," "plan," "will," "should," "intend," "seek," "potential" and similar expressions and variations are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. All forward-looking statements address matters that involve risks and uncertainties, many of which are beyond our control. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in such statements and, therefore, you should not place undue reliance on any such statements.

These factors include, without limitation, economic, business, competitive, market and regulatory conditions and the following: decreases in the demand for leased containers; decreases in market leasing rates for containers; difficulties in re-leasing containers after their initial fixed-term leases; our customers' decisions to buy rather than lease containers; increases in the cost of repairing and storing our off-hire containers; our dependence on a limited number of customers and suppliers; customer defaults; decreases in the selling prices of used containers; the impact of COVID-19 or future global pandemics on our business and financial results; risks resulting from the political and economic policies of the United States and other countries, particularly China, including but not limited to, the impact of trade wars, duties, tariffs or geo-political conflict; risks stemming from the international nature of our business, including global and regional economic conditions, including inflation and attempts to control inflation, and geopolitical risks such as the ongoing war in Ukraine; extensive competition in the container leasing industry; decreases in demand for international trade; disruption to our operations from failures of, or attacks on, our information technology systems; disruption to our operations as a result of natural disasters; compliance with laws and regulations related to economic and trade sanctions, security, anti-terrorism, environmental protection and anti-corruption; the availability and cost of capital; restrictions imposed by the terms of our debt agreements; changes in tax laws in Bermuda, the United States and other countries; and other risks and uncertainties, including those risk factors set forth in the section entitled "Risk Factors" in our most recent Form 10-K filed with the Securities and Exchange Commission ("SEC"), and in any subsequent documents filed or to be filed with the SEC by Triton from time to time.

The foregoing list of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included herein and elsewhere, including the risk factors in our Form 10-K. Any forward-looking statements made herein are qualified in their entirety by these cautionary statements. Except to the extent required by applicable law, we undertake no obligation to update publicly or revise any forward-looking statement, whether as a result of new information, future developments or otherwise.

Certain financial measures presented in this presentation are identified as not being prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). Please refer to the Appendix hereto for a reconciliation of such non-GAAP measures to their most comparable GAAP measures.

Industry and Market Data

Certain data included in this presentation has been derived from a variety of sources, including independent industry publications, third-party financial reports and other published independent sources. Although we believe that such third-party sources are reliable, we have not independently verified, and take no responsibility for, the accuracy or completeness of such data.

Highlights

 - Q4 Adjusted net income per share \$2.76, down 4.2% from Q3; Q4 annualized Adjusted return on equity 25.4%
 - Includes \$0.13 benefit from non-recurring items
 - FY 2022 Adjusted net income per share \$11.32, up 23.6% from 2021; 2022 Adjusted return on equity 28.4%
- **Market conditions slow after two years of exceptional container demand**
 - Trade volumes down and logistical bottlenecks easing
 - Shipping lines focusing on efficiency and increasing pace of container drop offs
 - Our utilization is decreasing, but remains high at 97.6%
- **Strong ongoing profitability supported by durable enhancements to our business**
 - Large block of 2021 containers on high value, long duration leases
 - Increased lease protection and duration across the portfolio; nearly 60% of CEU on lifecycle leases
 - Low cost financing locked-in through long-term, fixed-rate debt
- **Triton using strong cash flow to drive shareholder value even while container investment limited**
 - Pivoted from aggressive fleet investment and growth in 2021 to share repurchases in 2022
 - Repurchased 9.1 million shares in 2022, or 13.8% of shares outstanding, while decreasing leverage
- **Conditions remain challenging at start of 2023, but expect our financial performance will remain strong**
 - Expect Q1 EPS will decrease from Q4 due to soft conditions, negative seasonality and fewer days
 - Durable enhancements to lease portfolio and capital structure will sustain high level of profitability

Outlook

- Expect Adjusted EPS will decrease from Q4 2022 to Q1 2023
 - Negative seasonality adds to market pressure on utilization and disposal prices
 - First quarter has fewest number of days
 - Gain on a sizable lease prepayment and loss reversals added \$0.13 in Q4. Not expecting benefits to re-occur in Q1
- However, expect our profitability will remain high and expect pressure will ease as year progresses
 - Pace of off-hires should slow as seasonality improves and as excess container stocks shrink
 - Used container sale prices starting to approach normal ratio vs. new container prices
 - Expect continued benefit from share repurchases
 - Trajectory after Q1 will depend on how market evolves

Conclusions

Q4 2022 financial results provide a strong finish to an outstanding year

Market conditions challenging, but Triton will continue to build shareholder value quickly

- Have significant market advantages and have made durable enhancements to our business
- Expect financial performance will remain strong
- Expect we will continue to repurchase shares while container investment limited

Triton will be ready and well positioned to capitalize on market inflection

- Container supply / demand typically rebalance quickly due to short order cycle and sale of older assets
- Customers rely on leasing to manage market turns; Triton is the “Go To” supplier
- Often have best investment periods in early stages of market upturn

Non-GAAP Financial Information

We use the terms "Adjusted net income," "Adjusted EPS," "Adjusted return on equity," "cash flow before capex", "Adjusted tangible book value per share" and other non-GAAP financial measures throughout this presentation. These items are not presented in accordance with U.S. GAAP and should not be considered as alternatives to, or more meaningful than, amounts determined in accordance with U.S. GAAP, including net income, cash flow from operations or common shareholders' equity. These measures may not be comparable to similarly titled measures used by other companies.

Adjusted net income is adjusted for certain items management believes are not representative of our operating performance. Adjusted net income is defined as net income attributable to common shareholders excluding debt termination expenses net of tax, unrealized gains and losses on derivative instruments net of tax, and foreign and other income tax adjustments.

We believe that Adjusted net income is useful to an investor in evaluating our operating performance because this item:

- is widely used by securities analysts and investors to measure a company's operating performance;
- helps investors to more meaningfully evaluate and compare the results of our operations from period to period by removing the impact of certain non-routine events which we do not expect to occur in the future; and
- is used by our management for various purposes, including as measures of operating performance and liquidity, to assist in comparing performance from period to period on a consistent basis, in presentations to our board of directors concerning our financial performance and as a basis for strategic planning and forecasting.

Adjusted return on equity is adjusted annualized earnings divided by average shareholders' equity. Management utilizes return on equity in evaluating how much profit the Company generates on the shareholders' equity in the Company and believes it is useful for comparing the profitability of companies in the same industry.

Cash flow before capex (excluding certain items) is defined as income before income taxes plus unrealized (gain) loss on derivative instruments, net, debt termination expense, depreciation and amortization, principal payments on finance leases and NBV of container disposals less cash taxes, preferred stock dividends, and other non-recurring adjustments that we believe investors should consider in evaluating our cash flow results. Management utilizes this measure when analyzing financial performance and making operating and strategic decisions.

Adjusted tangible book value per share is defined as shareholders equity, less goodwill and net swap assets plus net deferred tax liability, before purchase accounting adjustments. Management utilizes this measure when analyzing financial performance and making operating and strategic decisions.

We have provided a reconciliation of the non-GAAP financial measures used in this presentation on the following pages.

Certain forward-looking information included in this presentation is provided only on a non-GAAP basis without a reconciliation of these measures to the mostly directly comparable GAAP measure due to the inherent difficulty in forecasting and quantifying certain amounts that are necessary for such reconciliation. These items depend on highly variable factors, many of which may not be in our control, and which could vary significantly from future GAAP financial results.

Additionally, throughout this presentation, the combined financial information from 2016 and prior periods does not reflect results on a GAAP basis.
