Operating Performance

"Triton’s record performance in the first quarter of 2022 provides a great start to what we expect will be another outstanding year,” commented Brian M. Sondey, Chief Executive Officer of Triton. “Triton generated \$2.76 of Adjusted net income per share, an increase of 3.4% from the fourth quarter of 2021 and an increase of 44.5% from the first quarter of 2021. In addition, Triton achieved an annualized Adjusted return on equity of 30.3%."

"Our first quarter performance reflects the significant operational and financial strength Triton is carrying in 2022. Our leasing margin continues to be supported by very high fleet utilization, the strong growth in our container fleet last year, our well protected portfolio of long-term, high value leases and our low average effective interest rate. Our gain on container disposals and trading margins also remained exceptionally high in the first quarter, reflecting a continued tight market for containers and Triton’s market-leading resale capabilities."

"We moderated our investment pace in the first quarter after record levels of investment and growth last year. Our shipping line customers aggressively added to their container fleets throughout 2021 to accommodate strong trade volumes and mitigate the impacts of logistical bottlenecks. They have so far been more cautious about

adding further container capacity in 2022, though container drop-off volumes have remained very low. As of April 29, 2022, Triton has ordered \$428 million of new containers for delivery in 2022."

"Overall market conditions remain constructive. Trade volumes continue to be supported by strong goods consumption, especially in the United States, and demand for containers is further supported by lingering logistical bottlenecks that are slowing container turn times. Container prices have decreased from their peak level reached last year, but remain historically very high, with factories quoting just below \$3,000 for a 20' dry container, providing strong support for lease rates and disposal prices."

"Triton continues to actively repurchase shares. Since resuming buybacks at the end of the 2021 peak season, Triton has repurchased 3.3 million shares, or 4.9% of shares outstanding, including 1.7 million shares year-to-date through April 29, 2022. Triton's strong and stable cash flow allows us to pursue multiple capital allocation priorities and we will continue to evaluate the relative attractiveness of fleet growth, share repurchases, increased dividends and other investments."

Outlook

Mr. Sondey continued, "We expect our performance will remain very strong in 2022 due to the durable enhancements we have made to our business, and we have many levers to drive shareholder value across a wide range of market conditions. Our Adjusted net income per share in the second quarter will likely decrease slightly from our record results in the first quarter, especially if used container sale prices and gains continue to normalize. But overall, we expect our profitability and Return on equity will remain very high throughout the year and into the longer term."

Share Repurchase Update

Triton's Board of Directors has increased the company's share repurchase authorization to \$200 million.

1. In the equipment fleet tables above, we have included total fleet count information based on CEU. CEU is a ratio used to convert the actual number of containers in our fleet to a figure based on the relative purchase prices of our various equipment types to that of a 20-foot dry container. For example, the CEU ratio for a 40-foot high cube dry container is 1.70, and a 40-foot high cube refrigerated container is 7.50. These factors may differ slightly from CEU ratios used by others in the industry.

The following table provides a summary of our equipment lease portfolio by lease type, based on CEU and net book value, as of March 31, 2022:

Lease Portfolio	By CEU		By Net Book Value	
Long-term leases	72.4	%	73.0	%
Finance leases	8.6		15.0

Use of Non-GAAP Financial Items

We use the terms "Adjusted net income" and "Adjusted return on equity" throughout this press release.

Adjusted net income and Adjusted return on equity are not items presented in accordance with U.S. GAAP and should not be considered as alternatives to, or more meaningful than, amounts determined in accordance with U.S. GAAP, including net income.

Adjusted net income is adjusted for certain items management believes are not representative of our operating performance. Adjusted net income is defined as net income attributable to common shareholders excluding debt termination expenses net of tax, unrealized gains and losses on derivative instruments net of tax, and foreign and other income tax adjustments.

We believe that Adjusted net income is useful to an investor in evaluating our operating performance because this item:

- is widely used by securities analysts and investors to measure a company's operating performance;
- helps investors to more meaningfully evaluate and compare the results of our operations from period to period by removing certain non-routine events which we do not expect to occur in the future; and
- is used by our management for various purposes, including as measures of operating performance and liquidity, to assist in comparing performance from period to period on a consistent basis, in presentations to our board of directors concerning our financial performance and as a basis for strategic planning and forecasting.

We have provided a reconciliation of net income attributable to common shareholders, the most directly comparable U.S. GAAP measure, to Adjusted net income in the table below for the three months ended March 31, 2022, December 31, 2021, and March 31, 2021.

Additionally, the calculation for Adjusted return on equity is adjusted annualized earnings divided by average shareholders' equity. Management utilizes Adjusted return on equity in evaluating how much profit the Company generates on the shareholders' equity in the Company and believes it is useful for comparing the profitability of companies in the same industry.
