

## TRITON'S SCOPE 1 & 2 ENERGY AND EMISSIONS FOOTPRINT

Summary (unaudited) <sup>1</sup>	2019	2020	2021	2020 to 2021 change
Total Energy Consumed <sup>2</sup> (MWh)	1,535	1,117	1,131	+1.3%
Total Energy Consumption Intensity (MWh / employee)	6.27	4.62	4.77	+3.4%
Total Energy Consumption Intensity (MWh / million of revenue)	1.05	0.78	0.63	-18.7%
Scope 1 & 2 Emissions <sup>3</sup> (MT CO2e)	385	272	264	-2.7%
Scope 1 & 2 Emissions (MT CO2e / employee)	1.57	1.12	1.11	-0.7%
Scope 1 & 2 Emissions (MT CO2e / million of revenue)	0.26	0.19	0.15	-21.9%

<sup>1</sup> Energy and emissions data and estimates follow the WRI / WBCSD GhG Protocol Corporate Standard.

<sup>2</sup> Total energy is defined as office heat and electricity consumption. All offices are leased. All office energy is reported as Scope 2. Where energy data was not available, reasonable estimates were used. Fluorinated gas fugitive emissions from air conditioning not readily available and estimated to be immaterial.

<sup>3</sup> Emissions are calculated using "market based" accounting methods, which includes any known additional renewable electricity purchases and/or renewable electricity credits (RECs). Please see detailed table below for "location based" emissions.

## TRITON'S SCOPE 1 & 2 ENERGY AND EMISSIONS (CONTINUED)

Footprint Detailed <sup>4,5</sup>	2019	2020	2021
<b>Our Business</b>			
Revenue (in thousands) <sup>6</sup>	\$1,458,303	\$1,431,460	\$1,783,909
Number of employees <sup>7</sup>	245	242	237
Square footage of leased office space	~75,000 sq. ft.	~75,000 sq. ft.	~75,000 sq. ft.
<b>Environment</b>			
Percentage of leased office & datacenter covered	~100%	~100%	~100%
Total Energy Consumed (MWh)	1,535	1,117	1,131
Total Energy Consumed from grids <sup>8</sup>	100%	100%	100%
Scope 1 – Total Direct (MWh) <sup>9</sup>	-	-	-
Scope 2 – Total Purchased Electricity (MWh)	1,019	660	674
Scope 2 – Purchased Natural Gas & Steam (MWh)	517	456	457
Electricity Renewables (MWh)	n/a	n/a	81
Electricity Renewables (%)	n/a	n/a	12%
Electricity Non-Renewable (%)	n/a	n/a	88%
Purchased Natural Gas & Steam Renewable	-	-	-
Purchased Natural Gas & Steam Nonrenewable	100%	100%	100%
Scope 1 & 2 Emissions (MT CO <sub>2</sub> e) Location Based	438	304	299
Scope 1 & 2 Emissions (MT CO <sub>2</sub> e) Market Based	385	272	264

<sup>4</sup> Figures may not add due to rounding.

<sup>5</sup> n/a = not available.

<sup>6</sup> Total revenues includes leasing, trading revenue and net gain on sale of leased equipment, source 2022, 2021 and 2019 Form 10-K.

<sup>7</sup> Total employees source 2022, 2021 and 2019 Form 10-K. Does not include contractors or Triton agents or their employees.

<sup>8</sup> Total energy from grids includes electricity and heat (natural gas and central district steam).

<sup>9</sup> According to GhG Protocol guidance, the offices that have natural gas heat and the office with central district steam heat provided are classified as Scope 2 – purchased energy. Therefore, no material Scope 1 energy and emissions are reported.

## TRITON'S SCOPE 1 & 2 ENERGY AND EMISSIONS (CONTINUED)

Regional Breakout for 2021	Americas	Europe	Asia / Australia
Percentage of Employee Distribution	60%	17%	23%
Total Energy Consumed (MWh)	799	272	60
Total Electricity Consumed	490	125	60
Amount of Renewable Electricity <sup>10</sup> (MWh)	-	81	-
Estimated Percentage of Renewable Electricity	-	65%	-
Scope 1 & 2 Emissions Location Based (MT CO <sub>2</sub> e)	221	43	35
Scope 1 & 2 Emissions Market Based (MT CO <sub>2</sub> e)	195	34	35
Energy Efficiency – Offices converted to LED lighting <sup>11</sup>	1	2	3

<sup>10</sup> Estimated renewable electricity includes green power utility program, power purchase agreement, RECs, On-site renewables, and excludes renewables generated on the electricity grid to avoid potential double counting.

<sup>11</sup> Based on third party research, switching to LED lighting can typically avoid ~9.4% of total energy consumption. In 2021, Triton had 20 office locations. Triton's Hong Kong office switched to LED lighting in August 2021 and experienced a 30-40% decrease in monthly electricity consumption which contributed to 19,748 KWh saving in 2021.
